Inventory and Warehouse Management

Inventory and Warehouse Management is the heart of **AdvancePro**. **AdvancePro** provides a complete supply chain inventory management, tracking, and control system that tracks inventory items, increases warehouse productivity, ensures you have stock on hand and significantly reduces paper flow.

Features include:

- Advanced Product Matrix – use our matrix grid to create unlimited variations on each product such as color, sizes and more
- Item Kits – create a new product made up of many individual products
- Advanced Units Of Measure (UOM) including real time conversion
- Multi-tier categories
- Multi-level pricing
- Volume discounts
- Automatic mark-up/mark-down by dollar (\$) or percentage (%)
- 3 images, attachments or hyperlinks per product
- User definable fields
- Multiple vendors per product
- Color coded status view allows tracking of committed, on-hand, available to sell, on order and on back order, inventory
- Lot & Serial Numbers
- Bar Coding
- Inventory items can be created in 3 ways:
 - Manually
 - Excel import
 - Import from existing accounting system
- Work with non-inventory and service items
- Multiple warehouses:
 - View and receive inventory by warehouse location
 - Transfer inventory between warehouses
- Pick/pack and ship orders
- Multiple picking locations
- UPS/FedEx integration
- Pallet creation
- Bill Of Lading (BOL)
- Set re-order levels

General System Management/CRM

Control your business process from A-Z.

Features include:

- Assign roles and permissions
- Set-up wizard to guide you through installation
- Crystal Reports engine allows any form to be exported to Excel, Word or as a PDF
- Accounting package integration
- Manage currencies, carriers, tax tables, back-ups and more
- Manage customer and vendor details
- Track customer and vendor order history
- Create custom fields
- "My Workspace" gives the user a quick overview of all inventory and order status

.NET Web Services

.NET Services are Internet based add-on's that are available with **AdvancePro**. They allow you to expand the functionality by adding various web sites that integrate with your inventory & order management solution. With **AdvancePro's** web services you can now combine your online strategy with your basic business practices.

Features include:

- The .Net platform allows you to manage your website off-line. Once you synchronize, all updates are reflected on the website and orders downloaded into **AdvancePro** for processing
- Available for B2B, B2C and Sales Reps:
 - B2B – enable online purchasing by your customers
 - B2C – sell products direct to the public
 - Sales Reps Automation - enables your remote sales force

Hear what others are saying about us

After analyzing **AdvancePro** and comparing us against 10 similar software products in our category (Inventory & Order Management) the Most Popular Brands panel has awarded **AdvancePro** its highest overall rating of 3 stars! **AdvancePro** was the only software package to achieve this rating! When comparing **AdvancePro** against our competitors, the review stated that "**AdvancePro** is a powerful and scalable software solution to everything having to do with inventory and order management. Its modular design is helpful in organizing all of the different aspects of order management. An excellent and affordable tool."

Most Popular Brands

"Prior to the installation of **AdvancePro** this was managed manually and was frequently inaccurate. Orders were difficult to track and we really had no idea as to what we physically held within our warehouse. We have found the system to be cost effective, stable, reliable and easy to use and thoroughly recommend it. We are presently using the 5 user version with the B2B module as an add in."

*Peter Findlay
Operations Manager
T&G Packaging, Auckland, New Zealand*

"**AdvancePro** has been the key component in allowing our operational staff to reduce time spent on inventory tasks to such an extent that they now have additional time to spend on customer satisfaction and the development of new business."

*Philippe Erramuzpe
President
Natural Cork, USA*

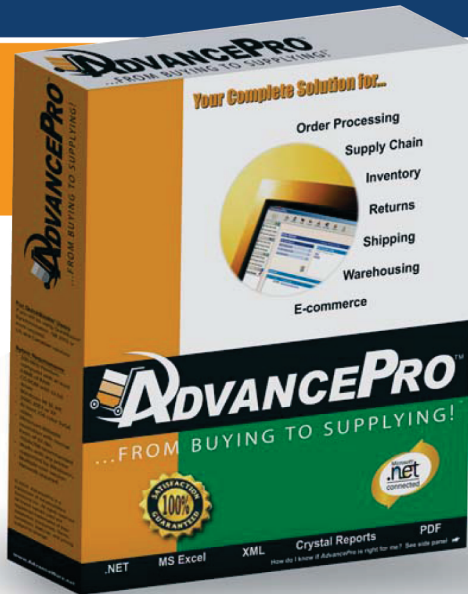

"**AdvancePro** has anticipated the needs of our companies growth by coordinating the following critical elements: customer and vendor orders, inventory management, and an intuitive reporting capability. It also works easily and effectively with our QuickBooks accounting platform to create an overall package that, elsewhere, costs tens of thousands of dollars."

*Larry Ross
VP/Chief Operating Officer
Autolink International, LLC, USA*
